

## The Fat Rack Bike Rack

Designed to pivot up to 160 degrees and fold away for maximum storage space efficiency, our Fat tire bike racks can be mounted on virtually any wall. Our fat bike wall mounts are perfect for fat tire bike enthusiasts looking for easy storage at home and to get out riding as quickly as possible.

### Fat Tire & Beach Cruiser Bike Storage Made Easy

If you own a fat bike, the chances are it can be very difficult to store properly. As fat bikes are wider and heavier than most, they tend to take up precious space in your home or garage and are likely to damage more easily from being unprotected or incorrectly stored away. The Steadyrack Fat Rack has been specifically designed to tackle beach cruiser and fat bike storage issues. The Fat Rack can be mounted on virtually any wall in your home or garage and can pivot up to 160 degrees and fold away, providing the ultimate storage space efficiency. The Steadyrack Fat Rack caters to bikes with tires up to 5 inches, in particular popular beach cruisers such as the Surly Ice Cream Truck, Canyon The Dude and the Mongoose Dolomite fat bikes. Not sure if your fat tire bike will fit on our wall mount? Read our how to measure your bike tips for more.
