

## The Mountain Bike Rack

Our MTB Rack is designed with larger and stronger folding arms to handle both regular MTB tire sizes as well as plus size tires. In fact, our MTB bike rack is also suitable for any bike with larger tire sizes including eBikes and heavy bikes up to 35kg / 77lbs. Like all our Steadyrack bike wall mounts, you can swivel or pivot your bike side to side up to 160 degrees to get your bike as close to the wall as possible.

### **MTB Storage Made Easy with our Bike Racks**

If you're looking for a mountain bike storage solution, the vertical mountain bike rack will also fold away when not in use for maximum storage and space efficiency. Our MTB Bike Racks can be mounted on any structurally sound wall or vertical surface, giving you peace of mind whether you're hanging your MTB in a hallway, in a garage or on a balcony. Wondering if our Steadyrack MTB wall mount is right for your bike? Read more about how to measure your bike
